The above training courses are broadly grouped under the following heads.

- 1) **Groundwater Survey and Assessment:** Hydrogeological investigations, development and management of ground water resources in alluvial and hard rock terrains covering ground water investigation and assessment techniques, equipment and practices adopted and procedure of analysis of basic water quality parameters and data validation.
- 2) **Ground Water Exploration and Planning:** Geophysical techniques and their applications in the field of ground water development and management, water well construction

techniques, equipment employed and other management aspects, conducting pumping test on various aquifers, data analysis using various software and use of ground water resources estimation and management system (GEMS).

- 3) **Ground Water Development and Management:** Ground water resources estimation, mathematical modelling, various techniques of managed aquifer recharge in different hydrogeological environments, integrated approaches in watershed development and management aspects incorporating conjunctive use of surface water and ground water and participatory groundwater management.
- 4) **The Ground Water conservation and protection:** This area of training courses are imparted to make the trainees aware of the provisions made in various acts of Govt. of India, underground water management, regulation and control, conservation practices to be adopted, etc.
- 5) **Administrative matters:** These types of training courses impart various rules in which Government employees are governed and other service matters. Such trainings are generally mandatory types to fulfill the eligibility requirements for promotion as per the recruitment rules.

Out of the scheduled 46 courses in AAP 2019-20, 26 tailor-made courses were exclusively conducted for the Officers of Central Ground Water Board. These courses encompassed the preparation of aquifer maps, integrated water resources management, maintenance management-drilling equipment, water well construction techniques and equipment, transient electromagnetic equipment, induction level training course for the newly recruited Officers of CGWB, mentoring skills, administration and finance, general administration, management principles and practices and use software such as Arc-GIS, visual mudflow, Terrset etc. Besides, various aspects of the development of managerial soft skills are also taught.

2.2 Training Courses

Components of Training Courses: The training courses consisted of two basic components i.e. theoretical and practical aspects with hands-on exercises. Each training schedule normally had 20 to 40 class-room lectures in 1-week and 2-week courses, respectively, with 1-2 days of field studies. The classroom lectures were intended to explain the theoretical parts, whereas the practical exercises and in-field demonstrations in separate formats were imparted to understand the field level activities. It was ensured that a case-study in each

course was discussed elaborately with all related data sets. An interactive session was also kept at the end of each course for sharing the knowledge gained by trainees, experiences and for clarifying doubts.

Practical Exercises: Practical sessions were conducted within the classrooms using paper graph sheets, computer software with a set of field data. Besides, hands-on exercises were done for the calculation and interpretation of field data and laboratory analysis of water samples.

Field Trips: Field trips were arranged in various hydro-geomorphic terrains and project areas to demonstrate field techniques adopted in various activities, such as hydrogeological, geophysical and chemical data acquisition etc. using various standard scientific instruments.

2.3 Training Modules

A stationary kit with all classroom reference materials was made available to the individual trainees. The *Training Modules* (study material) for each course were printed in book forms and were given to all the trainees free of cost. Some materials used for distribution included published manuals of CGWB such as Artificial Recharge to Ground Water, Surface Geophysical Surveys, Report of the Ground Water Resource Estimation Committee for Ground Water Resource Estimation Methodology-2015, Report on Detailed Guidelines for implementing the Ground Water Estimation Methodology, Report of the Working Group on Methodology for Assessment of Development Potential of Deeper Aquifers. Some other materials distributed to the trainees of participatory ground water management included manuals such as Planning Watershed Management Works of Central Water Commission, a book published by Food and Agriculture Organisation of the United Nations on Smallholders and Sustainable Wells, etc. Hand-outs of select lectures and soft copies, standard literature in printed book forms such as Ground Water Assessment, Development and Management, Water Well Drilling Techniques etc. were also distributed. For some courses on administration, standard published books on Administration & Finance and other relevant materials were given. The soft copy of lecture notes, power point presentations were given to the trainees in pen drives.

2.4 Evaluation of Training Courses

All the training courses were evaluated by the trainees and the almost all of them rated the courses as very useful. The classroom presentations made on various topics by the trainees were very encouraging and good presenters were awarded prizes. The suggestions/points raised by trainees were used for refining the training courses in the future.

2.5 Field Studies and Demonstrations

As the course contents were field-oriented and also for having first-hand knowledge about the field aspects and for handling various technical data. Field-trips were organized in various terrains/project areas and laboratories to demonstrate the field techniques used in various activities such as hydrogeological, chemical, geophysical data acquisition etc. using various scientific instruments that are normally prevalent in CGWB.

Trainees from Induction Level Training Course were taken to various sites to give real-time ground exposer related to various hydrogeological activities, as listed below.

3. STATE LEVEL CAPACITY BUILDING (TIER-II)

3.1 State Level Capacity Building (Tier II)

As the National nodal agency in implementing the National Project on Aquifer Management (NAQUIM), RGNGWTRI has devised a State Level (Tier II) training programme to build up the required manpower, mainly at users' and stakeholders' level, to them make aware of the ground water resources and ensure better maintenance of aquifers on which they depend. In turn, they would receive the assessment of the ground water resources for developing suitable national police and programmes.

These training programmes are organised through CGWB's Regional Offices and envisages the involvement and participation of officers' from Central and State Government Organisations, and technical personal from NGOs, VOs, PRIs, Industries etc. to transfer technical know-how and infuse a sense of ownership amongst the stakeholders.

3.2 Training Theme and Technical Sessions

The topics of the training courses encompass the entire spectrum of hydrogeological aspects involving in the hydrological cycle, local hydrogeological conditions, rainfall, ground water quality of the area, issues and remedial methods, concepts of NAQUIM, watershed management and ground water conservation techniques to manage the regional/local ground water issues.

As such, during the AAP 2019-2020, the Tier II State Level trainings were held on the theme "**Local Ground Water Management Issues**". A total of 19 training courses against the target of 20 were organised in the entire country from April 2019 to March 2020, in which 597 trainees participated including 127 women participants. One Tier-II training course scheduled during the month March 2020 could not be completed due to COVID-19 and subsequent lockdown declared by the Government of India.

3.3 Training Modules

A general module for the Tier-II training titled "Local Ground Water Management Issues" was prepared to cover the entire gamut of ground water management technics under the technical guidance of the Member (RGI) and Regional Directors of RGNGWTRI and sent to all Regional Directors for inclusion of local ground water issues and distribution to the trainees.

As a part of training programme, field visits were also arranged during which trainees were given demonstrations on the following areas such as studying of topo-sheets and identification of various features, data collection, draft calculation and determination of the specific capacity

of well, measurement of the piezometric head, interpretation of data and hydrographs, measurement of the field EC, pH and fluoride using field kits, pollution due to municipal liquid and solid waste, artificial recharge structures and their impact, rainwater harvesting (RWH) theme parks and explanations on water resource sustainability, water use efficiency, mitigation of drought situations and quality deterioration etc. Also, taught problems related to water levels in various regions and groundwater exploratory drilling operations, conducting of pumping tests in CGWB sites, managed aquifer recharge structures and aquifer management plan, filtration process of surface water and water supply etc.

3.4 Stake-holder Participations

In 19 tier-II training programme, 597 trainees including 127 women participated. They represented various organisations including the State Ground Water Departments, Public Health and Engineering Departments, Agriculture Engineering Departments, Tamil Nadu Water Supply and Drainage Board (TWAD Board), State Ground & Surface Water Resources Data Centres, SG & SWRDC, State's Zilla Panchayaths, Groundwater Surveys and Development Agency (GSDA), academicians and research scholars from Universities, NGO's etc. The State-wise break-up of the Tier-III trainings with details is given in **Table 6A** and **Table 6B**.

4. BLOCK LEVEL CAPACITY BUILDING (TIER-III)

Forty-four (44) Block level (Tier-III) trainings on “Local Ground Water-Related Issues and Participatory Ground Water Management” were organized to build capacity at village/ block level in local vernaculars and thereby prepare the rural youths and the general public to function as *Jalrakshaks*. These trainings would enable them in acquiring and providing information on the status of ground water at the aquifer levels and in turn assist the Panchayat Administrations in ground water planning and sustainability of the aquifers.

4.1 Training Theme & Technical Sessions

The course modules were designed to cover the local hydrogeological set-ups, local water-related issues and benefits of the participatory ground water management approach for mitigation of the water scarcity. Brochures depicting the basic information on geography, soils, irrigation, agriculture, geology, aquifer potentials and water quality were compiled with special emphasis on local water scenarios. The modules of courses (study materials) prepared and published by RGNGWTRI in Hindi were translated into local vernaculars to help participants understand the concepts.

Tier-III trainings were conducted for one day on various sub-themes covering various aspects of aquifer potential, development and management of aquifers, water quality and its suitability. Many of the lectures were delivered in the local languages so that the local people and ground water stakeholders understood them easily.

Apart from these focused items, issues related to soil and water conservation, irrigation practices, modern agriculture techniques were also discussed. The participatory approach spearheaded by villagers as a community for ground water management at local levels was emphasized. The village groups are often involved in ground water audit by monitoring of rainfall, water levels etc. and displaying the results as the graph on panchayat display boards. The courses were, therefore, delivered accordingly. They were also educated on the calculations of the availability of water resources so that based on the water availability, villagers can take the unanimous decision about the crops to be grown during the forthcoming cropping seasons. The importance of water conservation and managed aquifer recharge structures *viz.* recharge pits, trenches, cement *bandhara* and underground *bandharas* which can be constructed by the villagers at suitable locations in watershed areas was also taught. The role of local public representatives including *Sarpanches* of the villages on various

governmental schemes, measures to be undertaken by villagers towards water management, and their positive outcomes were specially emphasized.

4.2 Training Modules

A general module for the Tier-III training titled 'Local Ground Water Related Issues and Participatory Ground Water Management' was prepared and sent to all the Regions for its translation into local vernacular and distribution to the trainees.

4.3 Stakeholder Participations

In the 44 tier-III training programmes, about 6233 participants including 2225 females from all sectors of water resource domain attended the training. They included farmers, public representatives, *Talhathi (Patwari)*, *Gram Sevaks*, *Sarpanchs*, Officers and Officials of local Government Offices such as those of BDO, Taluka, Forest Range, Agriculture, Irrigation, etc. Even many students and faculty members were covered in this training. The participants took full interest and were involved in interacting with expert faculty members deputed for the purpose. Registrations of trainees were undertaken and course materials were distributed to all the trainees. The State-wise break-up of the Tier-III training programmes with details is given in **Table 7A and Table 7B**.

अनुसंधान संस्थान के नवनिर्मित भवन का केंद्रीय मंत्री गजेन्द्र सिंह ने किया उद्घाटन

असन पथ न्यूज

रायपुर। राजीव गांधी राष्ट्रीय भूमि जल प्रशिक्षण एवं अनुसंधान संस्थान के नवनिर्मित भवन का केंद्रीय जल संसाधन मंत्री गजेन्द्र सिंह शेखावत ने उद्घाटन किया। रायपुर सांसद सुनील सोनी की पहल पर फिर से शुरू हुआ यह संस्थान नवा रायपुर के सेक्टर 23 तृता में स्थित है।

दिवंगत केंद्रीय जल संसाधन मंत्री विद्याचरण शुक्ल ने राजीव गांधी राष्ट्रीय भूजल संस्थान की आधारशिला रखी थी। केंद्रीय जल संसाधन मंत्री गजेन्द्र सिंह शेखावत ने कहा कि प्रधानमंत्री ने इस बार की सरकार के लिए विचार, पॉलिसी और गवर्नेंस केंद्र का जल का विषय रखा है। देश जल समृद्ध बने, जल और संरक्षित बने, यह सरकार का विचार, प्रयास और उस दिशा में

महानदी विवाद साथ बैठ कर सुलझा लें

महानदी जल विवाद पर उन्होंने कहा कि दोनों राज्य साथ में बैठे और अपने विवाद को सुलझा लें, ताकि आगे चलकर दोनों राज्यों के बीच में पानी का समुचित उपयोग हो सके और उस पानी को और आगे भी ले जाया जा सके, वैसे भी जहां तक जल का विषय है इसमें भी अब यही समय आ गया कि अपने हक के जल को केवल जल के बंटवारे से ऊपर उठकर उसको अन्य माध्यम से भी बांटे। मुझे लगता है कि छत्तीसगढ़ स्टेट को भी इस दृष्टिकोण से सोचने की आवश्यकता है। अगर इस दृष्टिकोण से छत्तीसगढ़ राज्य काम करेगा तो आगे बहुत लाभ होगा।

काम भी कर रहे हैं। प्रत्येक घर तक पीने का पानी पहुंचे, इस संकल्प के साथ केंद्र सरकार राज्यों को सहयोग करते हुए 18 करोड़ घरों पर पीने का पानी नल के माध्यम से पहुंचा रही है। गंगा नदी में सफाई अभियान चलाया

गया, तो छग की महानदी दूषित हो चुकी है, इसके लिए केंद्र सरकार राज्य को कोई मदद करेगी या राज्य सरकार पर ही छोड़ देगी इस सवाल पर कहा कि राज्यों का प्राथमिक रूप से कर्तव्य है कि इस दिशा पर काम करें। अब

से पहले जब देश में जल का विषय पर विभिन्न विभागों और मंत्रालयों द्वारा विचार किया जाता था, तब गंगा के अतिरिक्त जो अन्य नदियां हैं यह सब वन और पर्यावरण मंत्रालय के अधीन आती थी।

वही इस पर विचार करते थे, लेकिन अब क्योंकि जल के विषय को एक ही साथ मंत्रालय में एक ही छत के नीचे विचार किया गया। उनका पॉलिसी प्लानिंग किया गया। वह विभाग नेशनल रिवर कंजर्वेशन डायरेक्टरी उसको भी हमारे मंत्रालय के अधीन किया गया है। राष्ट्रपति ने अपने अभिभाषण में यह संकल्प व्यक्त किया था कि गंगा के अतिरिक्त अन्य प्रमुख नदियां जो देश में हैं, उसके ऊपर भी उसी माध्यम से काम करेंगे। शीघ्र इस पर योजना बनेगी, लेकिन प्राथमिक रूप से यह जिम्मेदारी राज्य सरकार की है।

केंद्रीय जल संसाधन मंत्री गजेन्द्र सिंह शेखावत ने मंगलवार को नवा रायपुर के ग्राम तूता में सुबह 11 बजे निर्माणाधीन ‘राजीव गांधी भूमि जल प्रशिक्षण व अनुसंधान संस्थान’ के भवन का लोकार्पण किया। इस मौके पर रायपुर सांसद सुनील सोनी, सचिव जल संसाधन उपेन्द्र सिंह, अध्यक्ष जीसी पति केंद्रीय भूमि जल बोर्ड और सदस्य सुनील कुमार विशेष रूप से मौजूद थे। इस दौरान केंद्रीय जल संसाधन मंत्री श्री शेखावत ने जल से संबंधित समस्याओं का उल्लेख करते हुए केंद्र सरकार द्वारा किए जा रहे कार्यों की जानकारी दी। उन्होंने कहा कि अटल जल भूजल योजना के तहत जनभागीदारी द्वारा भूजल प्रबंधन के लिए किए जा रहे योजनाओं की जानकारी दी। उन्होंने यह भी कहा

कि ‘हर घर नल से जल’ योजना के जरिए प्रत्येक घर तक जल पहुंचाने का काम शुरू हो गया है। साथ ही उन्होंने प्रशिक्षण संस्थान की उपयोगिता का जिक्र करते हुए कहा कि प्रशिक्षण संस्थान की स्थापना के बाद से अब तक 1180 प्रशिक्षणों का आयोजन किया है, जिसमें 80 हजार 600 प्रोफेशनल भूजल विषय में प्रशिक्षित किए गए हैं। सांसद रायपुर सुनील सोनी ने इस प्रशिक्षण संस्थान के लिए केंद्रीय मंत्री श्री शेखावत का आभार

व्यक्त किया। उन्होंने कहा कि इस प्रशिक्षण संस्थान से छत्तीसगढ़ की जनता को लाभ मिलेगा, छत्तीसगढ़ में भूजल का 44 प्रतिशत ही उपयोग हो रहा है, बकाया 60 प्रतिशत भूजल के उपयोग के लिए संबंधित विभाग मिलकर काम करेंगे, तो राज्य के किसानों को इसका लाभ मिलेगा, वे वर्षा आधारित खेती पर निर्भर नहीं रहेंगे। श्री सोनी ने रायपुर और गुरु क्षेत्र में 90 प्रतिशत भूजल दोहन पर चिंता भी जताई।
